SUBJECT INDEX

1. Atmospheric Propagation

The combined influence of diffraction coherency and atmospheric turbulence on the contrast of the registered images in infrared remote sensing **35,** 597

2. Detectors

2.1. HgCdTe

Derivation of the $(R_0A)_{T_l}$ product in N^+–P $Hg_{1-x}Cd_xTe$ photodiodes (A comment on the paper by A. Rogalski, *Infrared Phys.* Vol. 28, No. 3, pp. 139–152 (1988)) **35,** 79

Experimental studies on the performance of $Hg_{0.8}Cd_{0.2}Te$ photoconductors operating near 200 K **35,** 593

Performance of optimized $Hg_{1-x}Cd_xTe$ long wavelength infrared photoconductors **35,** 661

Observation of below band gap photoconductivity in mercury cadmium telluride **35,** 673

2.2. Other

New trends in infrared detector technology **35,** 1

Far infrared high-performance lead telluride-based photodetectors for space-born applications **35,** 23

An uncooled FIR detector using the avalanche injection effect **35,** 33

Rapid measurement of threshold non-uniformity in CCD multiplexers for hybrid focal plane arrays **35,** 579

Spectral characteristics of high temperature IR photodetectors with electromagnetic carrier depletion **35,** 585

Ge:Ga photoconductor arrays: design considerations and quantitative analysis of prototype single pixels **35,** 827

Computer modeling of carrier transport in PbSnSe photodiodes **35,** 837

Anisotropic and polarized intraband light emission of hot electrons **35,** 847

See also 3.5 Infrared Astrophysics—Instrumentation

3. Infrared Astrophysics

3.1. Astrophysical spectroscopy

Molecules of astrophysical interest: recent submillimeter and infrared spectra **35,** 267

Infrared data of sulphides of interstellar dust importance **35,** 361

3.2. Extragalactic

Early reionization in cosmology **35,** 83

The interstellar medium of galaxies as seen through images of the 158 μm [CII] line **35,** 311

Infrared spectroscopy of starburst and Seyfert galaxies **35,** 349

The diffuse ISM in two edge-on galaxies—NGC891 and M82—images in the 3.3 μm PAH feature **35,** 383

MAX searches for intermediate-scale anisotropy of the cosmic microwave background **35,** 431

Correlation of the radio continuum intensity with the FIR luminosity and its implication for dust heating sources and physical processes in galaxies **35,** 527

3.3. Galactic

Far-infrared studies of the Orion Nebula **35,** 161

Star formation in young embedded clusters: new observational results using near-infrared detector arrays **35,** 167

Balloon-borne imaging of the Cygnus-X region at 260 μm wavelength **35,** 221

Infrared cirrus, what have we learned? **35,** 291

Excitation of the inner pc of the Galactic Center: results from near-infrared spectroscopy **35,** 303

Infrared measurements from the Cosmic Background Explorer (COBE) **35,** 331

mm/submm-Bolometer observations of star-forming regions **35,** 337

Large scale [CII] line emission in the galaxy observed by stratospheric balloons **35,** 391

Infrared observations of the center of the Galaxy **35,** 419

Molecular cloud structure traced by submm- and far-IR spectral line observations **35,** 493

Submillimeter and infrared astronomy: recent scientific and technical developments **35,** 551

The impact of near-infrared array imaging on studies of star-forming regions **35,** 569

3.4. Ground, balloon, airborne and spacebased observations

SOFIA—Stratospheric Observatory for Infrared Astronomy **35,** 153

Design and performance of stratospheric balloon-borne platforms for infrared astrophysical observations **35,** 195

The Infrared Space Observatory (ISO) **35,** 211
SPM, a submillimeter photometer for PRONAOS **35,** 277
FIRST—Far InfraRed and Submillimetre Space Telescope **35,** 407
The Atlas SIRTF **35,** 539

3.5. Instrumentation
Advanced far-infrared detectors **35,** 127
Infrared speckle interferometry with 2-D arrays **35,** 147
Astronomical observations with the Mid-InfraRed Array Camera, MIRAC **35,** 175
TIMMI, ESO's new 10 μm camera/spectrometer **35,** 203
A medium resolution ground based submillimeter spectrometer **35,** 321
The heritage of the IRAS Low Resolution Spectrograph **35,** 439
Nanostructure GaAs Schottky diodes for far-infrared heterodyne receivers **35,** 451
Antenna-coupled superconducting contacts in submillimeter and FIR astronomy **35,** 463
High resolution diode laser and heterodyne spectroscopy with applications toward remote sensing **35,** 477
Liquid-helium cooled scanning far-infrared Fabry–Perot interferometer for astronomical observations with a balloon-borne telescope **35,** 863

3.6. Solar system
Solar-System studies in the infrared range: recent developments and future plans **35,** 95
Infrared array detectors in astrophysics **35,** 107
Physics and chemistry of upper atmospheres of planets from infrared observations **35,** 243

3.7. Stars
Progress on IR observations of circumstellar disks **35,** 81
The near-infrared spectrum of U Sagittae at primary eclipse **35,** 119
Circumstellar matter in Herbig AeBe stars **35,** 375
NIR high-resolution imaging of young stars **35,** 487
An IR spatial interferometer at 10 μm wavelength and measurement of stellar dust shells **35,** 503

4. Instrumentation

Far-infrared modulation techniques based on optical excitation of semiconductors **35,** 73
Microwire arrays for infrared polarizers **35,** 709
Measurement of true transmittance of samples mounted on an aperture plate **35,** 739
Narrow-band far-infrared interference filters with high-T_c superconducting reflectors **35,** 807

See also 3.5. Infrared Astrophysics—Instrumentation

5. Lasers

5.1. Application
IR laser thermolysis of tetramethylgermane for CVD of germanium **35,** 633
Substance separation by the action of a pulsed IR laser radiation on gas-mixture flows through capillaries **35,** 757
Field distribution effects in laser driven diffusion through metal capillaries **35,** 765

5.2. CO_2
The first optical-free-induction-decay system with a tunable single-mode high-pressure CO_2 laser **35,** 67
An approximation for the electron energy distribution function in CO_2 laser discharges **35,** 733

5.3. Optically pumped FIR
Gain saturation in single pass and double pass optically pumped laser amplifiers **35,** 645
Plasma-shutter for far-infrared laser radiation **35,** 655
$CH_3{}^{18}OH$: FIR laser line frequency measurements and assignments **35,** 743
Characterization and frequency measurement of a new far infrared laser line from CH2F2 **35,** 855
Resonant array input couplers for optically pumped FIR lasers **35,** 859

5.4. Semiconductor
Guided modes and far-field patterns of lead chalcogenide buried heterostructure laser diodes **35,** 47

6. Nonlinear Optics

Absorption of $LiIO_3$ in the infrared for the ordinary direction of propagation **35,** 801
Noncritical vectorial phase matchings in nonlinear optics of crystals and infrared up-conversion **35,** 881

7. Spectroscopy

7.1. Gas
The extent of unwanted infrared photoacoustic signals from polymer sampling tubings exposed to ultraviolet radiation **35,** 637

Semiclassical line mixing analysis in the first overtone band of CO compressed by N_2 **35,** 897

7.2. Insulator
Evaluation of the Moelwyn–Huggesh parameter and temperature derivatives of compressibility of mixed alkali halides **35,** 59
Thermodynamical properties of fluorite structure crystals **35,** 63
Infrared studies of hard hydrogenated amorphous carbon (a-C:H) film and the effect of argon plasma treatment **35,** 617
Far-infrared reflectivity spectra of L-arginine phosphate monohydrate (LAP) **35,** 625
Theory of far-infrared reflectivity and surface magnetic polaritons of rare-earth magnets **35,** 681
Intercomparison of near infrared bands in natural and cultured quartz crystals **35,** 785
Vibrational spectroscopy of ion-irradiated pentacene **35,** 791
Absorption of $LiIO_3$ in the infrared for the ordinary direction of propagation **35,** 801

7.3. Semiconductor
Detection of a combination of defect activated phonon modes in AlAs/GaAs superlattice structure by Fourier Transform Spectroscopy **35,** 41
Far-infrared modulation techniques based on optical excitation of semiconductors **35,** 73
General relation between refractive index and energy gap in semiconductors **35,** 609
Modelling the reflectance of silicon **35,** 701
A classical oscillators model for infrared reflectance spectra of Zn_3P_2 **35,** 775
The Raman scattering of Zn_3As_2 **35,** 781

See also 3.1. Infrared Astrophysics—Astrophysical spectroscopy

8. Thermal Imaging, Signatures, etc.

The combined influence of diffraction coherency and atmospheric turbulence on the contrast of the registered images in infrared remote sensing **35,** 597
Minimum temperature difference detected by the thermal radiation of objects **35,** 715
Monte-Carlo simulation study on the infrared radiance statistics of bare ground terrain **35,** 813
Derivation of temperature and emittance from airborne multispectral thermal infrared scanner data **35,** 817

9. Other

BRDF reference standards for the infrared **35,** 873
